

Could we have sections on the site: East-West toward the highway and on Hoendiep canal and the European site and North-South toward Hoendiep road, Hoendiep mixed industrial zone, European site, Hoendiep canal and former sugar factory site can be useful.

Sections are uploaded to the competition site under “new documents after launching”.

We would like to have a 3D dwg file with the existing environment of the European site.

Unfortunately no 3D files are available.

Is the information already available about the future of the sugar factory site as is written in the report of the site visit?

Different from what was expected, the municipality still did not decide about a concrete destination for the SuikerUnie site. The point is there are no means to develop a programme. If, however, external funds are found, the municipality will cooperate in realising ideas that came from the competition for that site. More initiatives at the same time are possible. Small ones will probably start first, among which some cultural activities during summer. One of the main problems is the accessibility of the area, also because that prevents the potency of the area to be experienced.
